The Online Philosophy Class focuses on the Philosophy of Esoteric Healing; the science of healing through the energy field utilizing spiritual healing principles. In this Part 6 class we will be deepening our study of the subtle bodies, look at our Constitution from a Monadic perspective, begin to look at the structure of the Monad, continue our study of the causal body and higher centers, and have an introduction to neuroanatomy. This portion of the class will prepare and support students for the practical application portion of this class.

The Online Practical Application experience is where you deepen your practical application of Esoteric Healing. This class for the practical application continues to

authenticate the philosophical study of Esoteric Healing. Part 6 now provides specialized triangles as students begin deeper work with the permanent atoms, emotional and mental bodies, the spleen as a center, causal body, spiritual triad, and Monad, as well as some neuroanatomy and new Rays. This class continues to support the process for the emergence of the Soul through the vehicle of the personality – all according to the will of the soul.

Students are expected to come to the practical application class well prepared in their alignment and attunement process, familiar with balancing the Basic Petals detail from the Part 5 class, and providing Esoteric Healing sessions.

Who should take this class? Any Esoteric Healing student who meets the above pre-requisites. Proof of attendance may be requested.
